

## About us:

EXSENSE Electronic Technology Co., Ltd. is a private high-tech company, involved in the Production Selling, R & D of NTC thermistor, temperature sensor and electronic materials in question. Depending on the strong cooperation in circle, we provide complementary service for various electronic components.

Adopting advanced semi-conductor processing system, combining with NTC Thermistor and temperature sensor and electronic materials with our own intellectual property rights, and using high precision material processing, cutting, sealing, packing and testing equipment from Japan, Taiwan and Germany, we are able to manufacture in batchs. Meanwhile, through creative management and intensive quality control, we assure the high stability and reliability during continuous production. At present we mainly manufacture items as follows: AT series – non-insulated lead type NTC thermistor, LT series – non-insulated lead (small type) NTC thermistor, BT series – insulated lead type NTC thermistor, IT series -- high precision NTC for electronic thermometer, CT series -- chip NTC thermistor, FT series -- film type NTC thermistor, GT series -- glass sealed NTC thermistor, PT series -- power type NTC thermistor, TS series -- NTC temperature sensor, OT series -- OA (office automation) NTC thermistor & temperature sensor, VT series -- NTC thermistor for vehicle temperature sensor & thermo switch making, VTS series -- vehicle temperature sensor & thermo switch, MT series -- NTC thermistor for medical temperature sensor making, DT series -- die (bare chip) NTC thermistor, DTV series -- die (bare chip) NTC thermistor for vehicle temperature sensor & thermo switch making, and DTM series -- die (bare chip) NTC thermistor for Medical temperature sensor making.

We keep bringing forth new ideas and possess various intellectual property rights in the field of temperature sensor and electronic materials.

We keep improving our R & D and cooperating with people in this occupation. We work hard to supply our customers with both high-tech products and quality service.

We pursue our management philosophy as following:

Striving for perfection-----quality cast brand;

Sharing development-----repay staffs and society;

True Practice-----enterprise serve our country.

## Basic Characteristics of NTC Thermistor

### What is NTC Thermistor?

**NTC:** Negative Temperature Coefficient

**Thermistor:** Thermally Sensitive Resistor

[A]Nonlinear temperature [B]Close to real temp. while  
Y axis as log coordinates

**NTC Feature:** Exhibit a decrease in resistance when temperature rises.

Thermistor is a semiconducting ceramic resistor produced by sintering the materials at high temperature and made mainly from metal oxide. NTC thermistors are resistors with large negative temperature coefficient. Change in resistance of the NTC thermistors can be brought about either externally by a change in ambient temperature or internally by self-heating resulting from a current flowing through the device. At certain measure power, its resistance reduces rapidly while the temperature getting increases. Taking advantage of this characteristic, it can achieve the detecting and controlling temperature purpose.

#### 1. Zero-power resistance ( $R_T$ )

The zero-power resistance is the value of a resistance when measured at a specified temperature, under conditions such that the change in resistance due to the internal generation of heat is negligible with respect to the total error of measurement.

#### 2. Rated zero-power resistance $R_{25}$

The rated zero-power resistance is the nominal value at the standard temperature of 25°C unless otherwise specified.

#### 3. B constance in Kelvin's (K)

B constance is an index of the thermal sensitivity expressed by the formula:

$$B = \frac{\ln(R_1) - \ln(R_2)}{[1/T_1 - 1/T_2]}$$

Resistance in ohms ( ) at temperature T1  
Resistance in ohms ( ) at temperature T2  
 $T_1=2731.5k + (T_1^{\circ}C)$ ,  $T_2=2731.5k + (T_2^{\circ}C)$

The B constance, unless otherwise specified, is calculated using the zero-power resistance when 25°C and 50°C in environment temperature.

#### 4. Dissipation factor( $\delta$ )

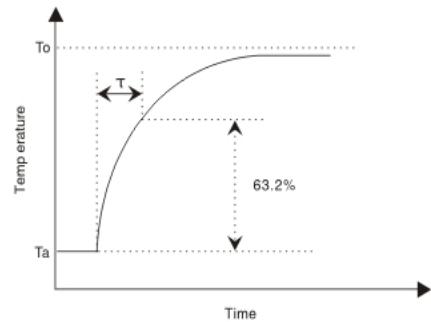

$$\delta = \Delta P / \Delta T \text{ (mW/}^{\circ}\text{C)}$$

Dissipation factor ( $\delta$ ) is power in milliwatts required to raise thermistor temperature  $1^{\circ}\text{C}$ , measured with thermistor suspended by its leads in a specified environment.

#### 5. Thermal time constance ( $\tau$ )

$$\tau = C / \delta$$

Thermal time constance ( $\tau$ ) is the time required by a thermistor to change 63.2% of the difference between its initial and final temperature, measured with thermistor suspended by its leads in specified environment.

#### 6. Power rating

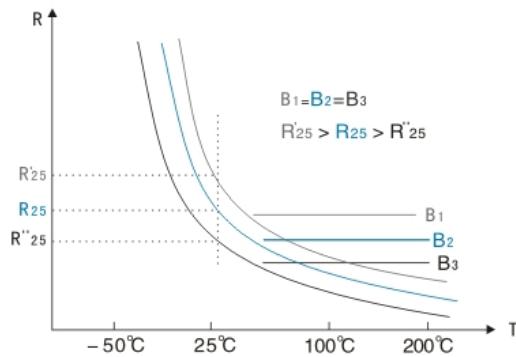

Rated power = heat dissipation factor  $\delta$  × (maximum operating temperature –  $25^{\circ}\text{C}$ )

#### 7. Resistance/temperature characteristic

The resistance law of the relationship between the zero-power resistance of a thermistor and its body temperature follows approximately the formula:

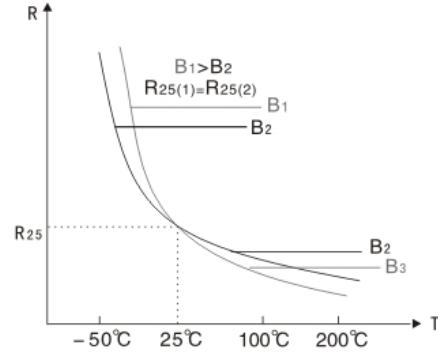

$$R = R_1 e^{B\left(\frac{1}{T} - \frac{1}{T_1}\right)}$$

R1: Resistance value at absolute temperature T1 (K)  
B: B constance

A

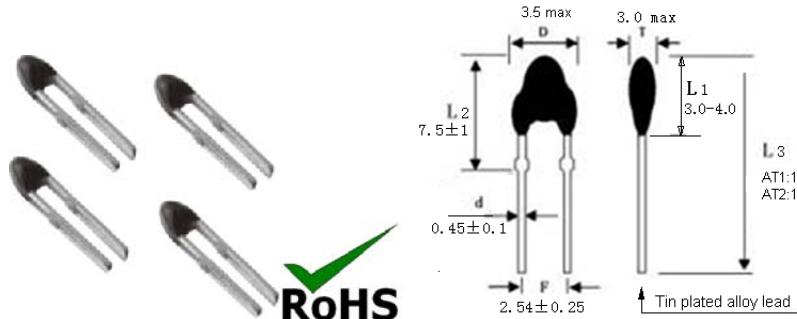

A. The same B constance while the different resistances

B

B. The same resistance while the different B constances

## AT Series—Non-insulated Lead Type NTC Thermistor

unit : mm

### FEATURES

- Small size, Fast response, High sensitivity
- High accuracy tolerances to +/-0.1°C
- Excellent thermal cycle endurance
- High stability
- Operating ranges from -50°C ~ +125°C

### APPLICATION

- Home electronics
- CPU fan
- Battery and charger
- Automobile electrics
- Electric table-board
- Heating apparatus
- Electronic clock
- Computer main board
- Air-conditioner
- Liquid level sensor
- Battery of mobile telephone

## LT Series—Non-insulated Lead (Small Type) NTC Thermistor

### FEATURES

- Small size, Fast response, High sensitivity
- High accuracy tolerances to +/-0.1°C
- Excellent thermal cycle endurance
- High stability
- Operating ranges -50°C ~ +125°C

### APPLICATION

- For high accuracy temperature sensor production

## BT Series—Insulated Lead Type NTC Thermistor

### FEATURES

- Small size, Fast response, High sensitivity
- Hig operating ranges from -30 °C ~ +125°C
- High accuracy tolerances to +/-0.10°C
- Excellent thermal cycle endurance
- High stability
- Pb free, RoHS compliance

### APPLICATION

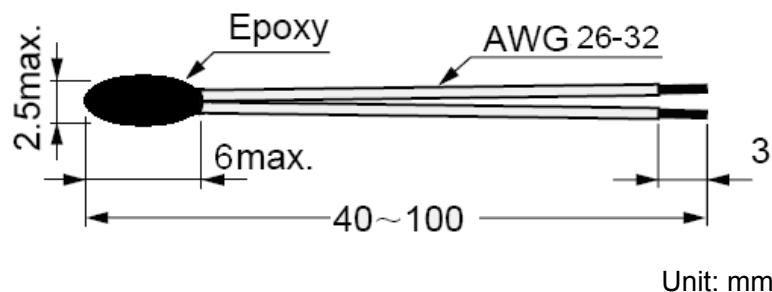

- Battery pack for computer & home appliance etc.

## CT Series--Chip Type NTC Thermistor

### FEATURES

- All sizes are constructed 4-side glass encapsulation, high reliability and stability available.
- Highly reliable multilayer and monolithic structure, Leadless, ideal for high density SMT installation.
- Excellent Temperature Coefficient, Wide ranges of operating temperature (-40°C ~ +125°C)

### APPLICATION

- TCXO, Temperature compensating circuit of LCD
- Temperature sensing in rechargeable batteries and chargers \ CPU
- IC and Semiconductor protecting
- Printer temperature compensating circuit. Player Driver
- Telecom exchanger
- DC/AC transformer and HIC over heat protecting.

## FT Series--Film Type NTC Thermistor

### FEATURES

- Suitable for narrow space
- Rapid response time
- Elastic and solder easily
- Oprating temperature: -50°C ~ +90 °C

### APPLICATION

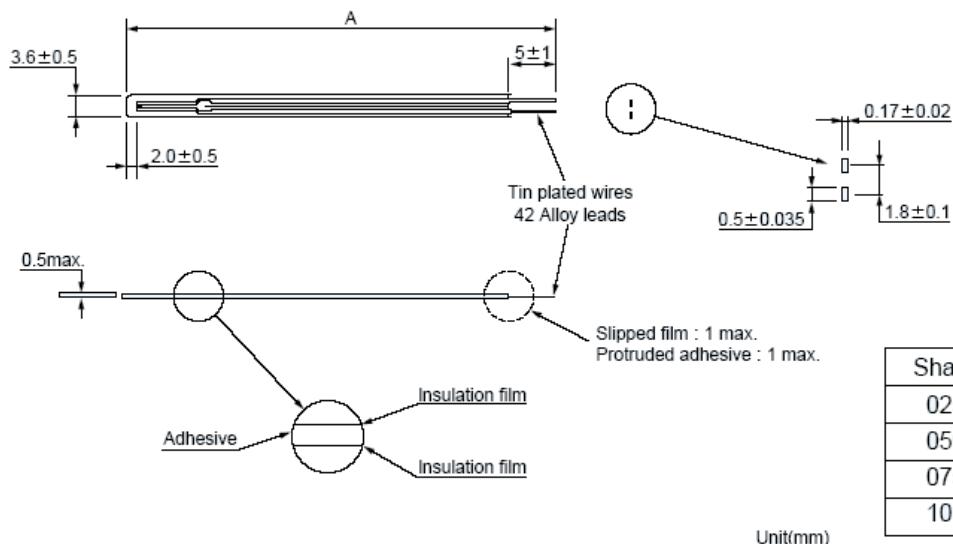

- Narrow temperature detecting space
- Computer
- Printer
- Home appliances

## GT Series--Glass Sealed NTC Thermistor

-A (AXIAL)

-R (RADIAL)

### FEATURES

- High reliability, stability, high sensitivity
- Wide range of resistance: 0.5 ~ 1000KΩ
- Usable in high-temperature and high-moisture environments due to the glass wrapping
- Small, light, firm structure, convenient automatic installation on PCB
- Rapid response time
- Operating temp. -55°C ~ +250°C

### APPLICATION

- Temperature compensation and detection for Office automation facilities (e.g. Copiers, printers etc.)
- Industrial, medical, environmental protection, weather and food processing equipment
- Household appliances (air conditioners, microwave ovens, electric fans, electric heaters)
- Liquid level display and flow water measurement
- Apparatus coils, integrated circuits, quartz crystal oscillators and thermocouples
- Electronics Thermometer
- Medical instrument

## -R RADIAL Type Electronic Parameter Specification

Part No.	Rated Resistance $R_{25}$		B Value ( 25/80°C )		Operating Temp. °C )
	KΩ	Tolerance	K	Tolerance	
GT□□3450-R	2~10	$\pm 1\%$ $\pm 2\%$ $\pm 3\%$ $\pm 5\%$	3450	$\pm 0.5\%$ $\pm 1\%$ $\pm 2\%$	-20 ~ +250
GT□□3750-R	8~10		3750		
GT□□3950-R	10~50		3950		
GT□□4150-R	50~100		4150		
GT□□4200-R	100~350		4200		
GT□□4350-R	870~980		4350		
GT□□4450-R	1000~1500		4450		

Parameter	Charactaristics			Condition
	R1	R2	R3	
Dissipation factor( $\delta$ )	1.2~1.3	0.7~0.8	0.4~0.5	In still air
Thermal time constance ( $\tau$ )	10~11	4~5	2.3	In still air
Power rating	$\leq 50$	$\leq 35$	$\leq 15$	@maximum operating temperature

## PT Series--Power Type NTC Thermistor

PT series NTC thermistor has to be connected in series to the power source circuit to avoid the surge current at the instant when the electronic circuits are turned on. The device can effectively suppress the surge current, and its resistance and power consumption can be greatly reduced after that through the continuous effect of the current so as not to affect the normal work current. Therefore the Power NTC thermistor is the most convenient and efficient instrument to curb the surge current and protect the electronic devices from being damaged.

### FEATURES

- Strong power and strong capability of surge current protection.
- Fast response to the rapidly surge.
- Big material constance(B value),Small remain resistance
- High reliability.
- Integral series, Extensive operating range.
- Operating temp. -55°C ~ +200°C

### APPLICATION

- Switching power supply
- UPS power supply
- Electric heaters
- Electric heaters electronic energy-saving lamps
- Filament protection of color tubes
- Incandescent lamps and other lights
- Electronic ballasts

- ◆ 17/5: “17” for curve shaped long lead, “5” for curve shaped short lead.

## TS Series--NTC Temperature Sensor

### FEATURES

- Fast response, High delicacy
- Good coherence and Interchange capability, high precision of resistance and B value
- Double packaging technics, Good quality of insulation and package, High capability of colliding and bending, High stability

### APPLICATION

- Air conditioners, Refrigerators, Freezers
- Water heaters, Potable water heaters, Air warmers, Washers, Disinfection cases
- Washing machines, Driers, Thermotanks

## OT Series--OA (Office Automation) NTC Thermistor & Temperature Sensor

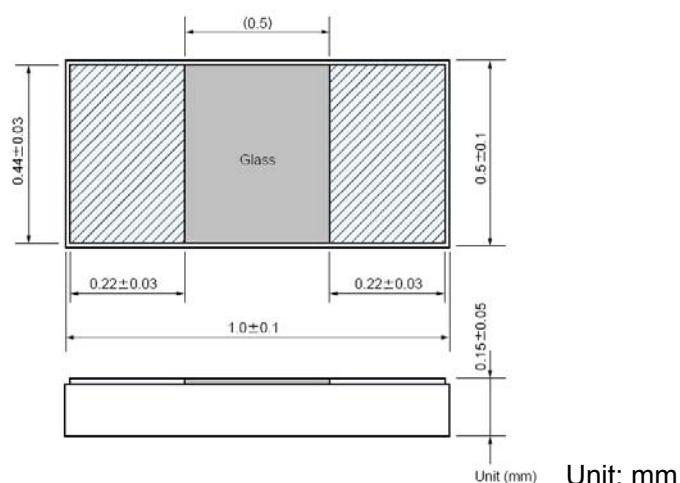

### FEATURES

- Fast response: thermal time constant: 2S max in still air
- High stability
- Excellent thermal cycle endurance
- Operating ranges: -50°C ~ +250°C

### APPLICATION

- OA Machine: Printer, Copier, Fax machine
- Fast response application

### DIMENSION

## MT Series--NTC Thermistor for Medical Temperature Sensor

### Making

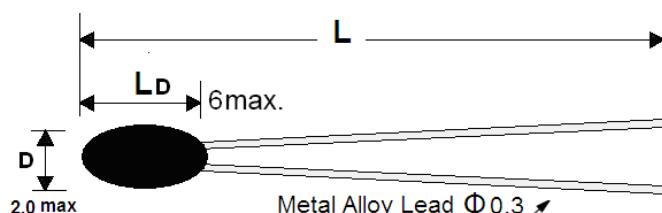

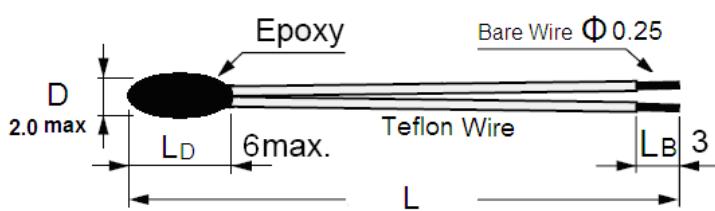

### FEATURES

- Fast response: thermal time constant: 3.5S max in still air
- High stability
- Excellent thermal cycle endurance
- High accuracy: tolerance up to  $\pm 0.02^{\circ}\text{C}$

### APPLICATION

- For various kinds of medical temperature sensor making, e.g.: Skin/ Coelom / Body Temperature Sensor

### DIMENSION

Unit: mm

## DT Series--Die (Bare Chip) NTC Thermistor

### DIMENSION :

### FEATURES

DT series NTC thermistor is the newest development in chip NTC thermistors. The miniature package is designed for hybrid applications where bonding wire or Au/Sn solder is used as the attachment method. The terminations on the top and bottom of the thermistor are gold (Au) plated for the ultimate in hybrid designs and construction.

- High accuracy tolerances to +/-0.1°C
- Excellent thermal cycle endurance
- High stability
- Operating ranges from -50°C ~ +200°C

### APPLICATION

- Hybrid designs and construction
- High Precision NTC Temperature sensor

### Part Number Identification
