I. Product Description

ADOS RTV Silicone Remover is specifically formulated to attack and remove all types of old cured RTV silicone sealant. It reaches awkward and hard to reach places saving you time and effort. It will not attack substrates and will leave surfaces clean, tidy and ready to apply sealant to.

II. Application and Directions

Preparation:

Cut away as much old silicone as possible with a craft knife. Surfaces to be treated must be clean and tidy. **CAUTION:** Test on inconspicuous area of substrate in case surface damage occurs.

Application:

Cut nozzle to a an opening slightly wider than the bead or sealant to be removed. Apply liberally to the silicone sealant. Using spatula spread ADOS RTV Silicone Remover so that it covers all the sealant to be removed. Leave overnight then gently remove the digested silicone sealant with a blunt edged spatula. Wash away any remaining sealant residue with water. A coarse cloth or nailbrush will help to clean down the surface.

Note: Test a small area first for colour fastness.

Clean Up:

Use Water to clean product off equipment and surfaces.

Limitations: Not suitable for use on textiles and nylons. May require a longer working time due to atmospheric conditions.

III. Features & Benefits

- Removes all types of RTV Silicone
- Cleans up with water
- Easy application
- Accesses hard to reach areas

IV. Typical Properties and Characteristics

Physical Properties & Performance Characteristics:

Type	Organic acid and solvent
Colour	Brown
Coverage	Approx. 4m (10mm bead) Approx. 8m (5mm bead)
Application	Cartridge gun/spatula
Cure Time	12-24 hours (depending on air temperature)

V. Package Description

Part Number	Size
8328	310ml Cartridge
